3. Description of Region 12: State of Idaho

The State of Idaho is a single planning region (Region 12) for both the 700 MHz and 800 MHz public safety bands. Region 12 is bordered by Canada on the North, the

State of Montana and the State of Wyoming to the East, the State of Utah and the State of Nevada to the South, and the State of Oregon and the State of Washington to the West.

From the pristine forests and mountainous areas of northern Idaho to the high plains areas of southern Idaho, the state has an assortment of population densities and economic diversities. The climate in the many regions of Idaho varies from sub-Arctic in the north to desert in the southwest area of the state. Indian and pioneer history abounds throughout Idaho.

There are 44 counties in Idaho. Boise (Ada County) is the largest city in this region and along with the cities of Caldwell (Canyon County), Kuna (Ada County), Meridian (Ada County), Eagle (Ada County), and Nampa (Canyon County) make up a metropolitan area that is the most significant economic engine in the western part of the state.

The largest urban areas in the eastern portion of the state are in Idaho Falls (Bonneville County) and Pocatello (Bannock County). The Twin Falls (Twin Falls County) urban area is in the south-central portion of the state. The southern portion of the state is rural and agricultural in nature.

In the northern part of the state, Coeur d'Alene (Kootenai County) is a significant urban area that is surrounded by forests and agricultural areas. Lewiston (Nez Perce County) is the only inland seaport in Idaho. Rural and agricultural areas surround Lewiston.

4. Notification Process

30 days notice was given prior to the first 4.9 GHz RPC meeting held on March 2, 2004. The meeting notification was posted on the State of Idaho, Region 12 website for public notifications, and sent to each member of the RPC via their email address of record.

The five Indian Tribal Governments in Idaho were notified of the 4.9 GHz meeting that was held in conjunction with the 700 MHz RPC meeting. It was determined at the March 2, 2004, meeting that the RPC would proceed with a 4.9 GHz planning effort.

All 4.9 GHz planning meetings are posted and open to the public. Meeting minutes are recorded, which include comments from all meeting attendees. The meeting minutes are maintained by the Regional Chairperson.

5. Regional Plan Summary

The goal of the RPC and this plan is to allow for the widest use of the 4.9 GHz spectrum and provide a conduit for cooperation and coordination for all public safety entities that may benefit from the spectrum usage.

Request for channels will be sent to the RPC Chair (contact information provided in section 2). Channel allocation is on a first-come first-served basis. Conflicts will be handled according to the priority matrix as described in the next section.

6. Priority Matrix

The following matrix will be used if two or more requests for the same spectrum are submitted to the RPC at the same time. Otherwise, frequency allocation will be granted on a first-come, first-served basis.

- Priority is given to users fundamentally involved with the protection of life and property (15 points).
- Priority is given to multi-agency systems that promote multi-agency, inter-discipline interoperable communications. These systems can be either a group of separate departments within a large agency, or groups of agencies operating together under a large blanket agency, or a combination of both (25 points).
- The submission of some form of proof of financial commitment, accompanied by a Request for Proposal (RFP) outlining the design of the proposed system and detailing the development of the requested channels will be required to be submitted to the RPC prior to approval (35 points).

7. Region Coordination

The RPC will evaluate all regional requests and applications for frequencies. The entire 50 MHz spectrum will be open to all county areas. An engineering review will be initiated to determine that the frequencies requested will not interfere with existing system plans. Given the low population density in Idaho and the availability of spectrum, the RPC does not perceive there will be conflicts for available channels. In the event there is a conflict the RPC will use the evaluation matrix as described in section 6 of this plan.

All requests are to be submitted to the Region 12 chairperson for evaluation by the RPC at the next scheduled RPC meeting.

8. Adjacent Region Coordination

Region 12 shares borders with neighboring Region 25 (Montana), Region 46 (Wyoming), Region 41 (Utah), Region 27 (Nevada), Region 43 (Washington) and Region 35 (Oregon). Region 12 will coordinate channel allocations with all bordering regions for those channels established by planning as statewide use. Region 12 will provide data to the National Public Safety Telecommunications Council (NPSTC) Pre-coordination Data Base to assist with adjacent region coordination.

The RPC will ensure that applicants complete coordination with Canada if required.

9. Spectrum Usage

Region 12 has a small population base spread over a large area. Currently there is little frequency congestion in other available spectrum including 700 MHz and 800 MHz and the unlicensed spread spectrum bands. The RPC does not believe there will be conflict for the 4.9 GHz frequencies. All of the 18 channels will be available for each county area on a first-come first-served basis. The RPC will review the applicants' system design to ensure the coverage does not extend beyond their jurisdictional borders.

Conflict resolution will be handled using the priority matrix as described in Section 6. The RPC is requiring that all 4.9 GHz license applications be approved by the RPC prior to submission to the FCC. The RPC will coordinate with new and existing applicants to encourage cooperation between public safety entities.

10. Future Planning Procedures

Future Planning & Minutes

Annual meetings and special meetings will be held in accordance with the 700 MHz RPC bylaws (Appendix A). Meeting announcements will be posted on the following website:

<http://www.700region12.org>

The RPC chair will maintain meeting minutes for a minimum of three years.

Database Maintenance

The RPC will use the existing FCC database or the NLECTC 700 MHz pre-coordination database if it is updated for the 4.9 GHz spectrum.

11. Chairperson Certification

“I hereby certify that all planning committee meetings, including subcommittee or executive committee meetings were open to the public.”

Signed 

Bart Hamilton
